NUMBER 239

The "bar" can't win in this Senatorial contest. Brains and honesty will win the battle.

The four per cent. government bonds have reached the remarkably high premium of \$112.

State Senator W. T. Price, of Black River Falls, has six hundred men in his employ in the pineries.

The Chicago, Milwaukee & St. Paul railway consumed during the past year about 600,000 tons of coal in running their locomotives.

The way the Democrats are debating in Congress, they don't seem to care how they trifle with public sentiment. This has always been the Democratic policy.

Congressman George C. Hazelton, of the Third district, has come out for Keyes for the Senate. The influence of Mr. Hazelton is a powerful element in the Third district.

Forty Republican newspapers in Wisconsin have strongly pronounced for Keyes for United States Senator. The Chicago Journal and the Inter-Ocean are favorable to him also.

It is very evident to the Democratic mind in Congress that the Republicans can't be bulldozed, therefore they say they don't mean any thing bad by the electoral count proposition.

Nearly four millions of gold from England arrived in New York in one day. This is one of the things the Republican party is doing for the country. When the Democrats controlled matters, the flow of gold was the other way.

There is no man in the country who will rejoice with more exceeding great joy over the downfall of John Kelly, than Mr. Tilden. Both of these Democratic politicians are on the level now. Both are down, and one is as good as the other.

Congress is going to take hold of the pleuro-pneumonia disease, which is creating such ravages among cattle in this country and in Europe. When Congress undertakes to put its foot upon a disease of that kind, the disease might as well back down.

It is now stated on good authority that the Milwaukee News has been purchased by a company of Republican capitalists, for \$15,000, and will turn the paper into a Republican morning journal, of which Hon. Horace Riddle will be the editor. There does not seem to be life and enterprise enough in the Democratic party in Milwaukee to support a Democratic paper, and hence the failure of the News. This purchase will give the Republicans a morning newspaper of which they have been deprived so long.

The Milwaukee Chronicle complimenting Judge Cassoday, says: "There seems to be an almost universal desire that Oramus Cole and John B. Cassoday shall be re-elected at the coming April judicial elections to the positions respectively of chief justice and associate justice of the supreme court. Only two papers in this State—the Appleton Crescent and Milwaukee News—oppose such a programme, which affords an additional reason for the re-election of the two persons mentioned."

The present session of Congress must be necessarily short. There is considerable business to do. The Democrats who have a majority in Congress understand this fact. But the strong-headed and the wrong-headed leaders of the party do not propose to attend to public business for the present. They want a partisan rule adopted about the electoral count, when nothing whatever can be gained by it. They would rather spend weeks in making a blunder than to devote the short time at their disposal in dispatching the business now before Congress. Well, if the important legislation of the present session, which demands attention, is neglected, and an extra session is called, the country will know just where the blame belongs.

## SHOCKING TRAGEDY.

Dubuque, Dec. 13.—W. T. Holbrook, agent of the American Express company, killed his little daughter and the shot himself. The tragedy occurred this morning, and the particulars are as follows: For some time Holbrook has been sick, and his friends noticed a change in his disposition. Sunday he worked at the office until late in the evening, and retired without creating any comment. The rules of the company require him to have a revolver at his side, and he has been in the habit of leaving it on a table in his bedroom. At 7 o'clock this morning his wife, while in another room, heard the report of a revolver, and rushed into his room just in time to see him place the revolver in his temple and fire. She rushed from the room and alarmed the neighborhood, and a second look showed that Mr. Holbrook had also sent a ball through his child's head, from which she could not recover. Medical aid was immediately summoned, but both died after lingering a short time.

## A Grand Reputation.

Warner's Safe Kidney and Liver Cure has reached a reputation that is not limited by the confines of section or country. There are no ingenuous substances nor false and temporary stimulations in the preparation. It is purely vegetable and compounded under a formula that has passed severe tests and won endorsement from some of the highest medical talent in the country.—New York World.

## IRELAND.

Mystery and Anxiety Rumors that the Government Will Use Coercive Measures in Ireland.

LONDON, Dec. 13.—The course pursued by Mr. Parnell, which means home rule or nothing, has forced the government to a step which is not unlikely to cause bloodshed in Ireland before many days. There was a prolonged meeting of the cabinet to-day, which was ominously preceded by an interview between the Duke of Cambridge, commander-in-chief of the forces, and the Right Hon. Hugh C. E. Childers, secretary of war. It is not considered proper to say what occurred at that interview, but you can form your own conclusions from the result of the cabinet meeting, which immediately followed. Mr. Forster, chief secretary for Ireland, came hurriedly to London a day or two ago, and demanded that coercive measures should be at once put in force in Ireland. "The Premier, who is unquestionably opposed to the use of violence, if he can peacefully secure the adoption of his plans of government, would not at first consent to the suspension of the writ of habeas corpus, which was the measure Mr. Forster urged, but there is reason to believe that Mr. Forster's persuasive eloquence finally prevailed. It is asserted at the clubs to-night, in spite of rumors to the contrary outside, that the cabinet decided to-day to use all the power of the government to crush the Land League movement in Ireland. This result has been so entirely unexpected of late that there was the greatest excitement at West End, and a stranger to London visiting the Pall Mall clubs to-night would assuredly conclude that we are already in the midst of a civil war.

## WAITING FOR A MAJORITY.

The Democrats will try and Get a Majority to Vote on the Morgan Resolution.

WASHINGTON, Dec. 13.—Speaker Randall is reported to have said to-day that as soon as the Democrats were able to bring enough of their member present to make a majority they intend to pass the joint resolution relative to the electoral vote, and that the Democratic majority would not consent to any theory that the Vice-President had any right to count the votes arbitrarily and select a President. It will be impossible, however, for the Democrats to get a quorum of their own members together. It requires 147 members to pass a measure. It is possible for the Democrats to get them together, but not probable, as several of them are lukewarm on the subject, and care very little whether the Morgan joint rule passes or not.

In circulating among the Democratic members to-night, it is found that they are of one opinion about the Morgan joint rule. They are greatly divided in sentiment as to whether to go ahead, or stop and allow public business to have a chance. It is probable that they will be a half go on with the public business, and attempt to get a quorum of Democrats here in January, and pass the measure over the heads of the Republicans, whether the latter vote or not.

## DEMOCRATIC BLUNDERING.

WASHINGTON, Dec. 13.—Frank Hurd did his best to commit the Democrats to another blunder to-day by trying to prevent the swearing in of General Garfield's successor, on the ground that the old district from which he was elected had ceased to exist, despite the fact that his credentials were entirely regular and his prima facie case perfect. Harris, of Virginia, and Stephens, of Georgia, however, came to the rescue of State rights and common sense doctrines, and Hurd was constrained to withdraw his opposition. The next Democrat to put his foot in it was Davis, of North Carolina, who insisted upon overhauling the Louisiana business and wasting time on the dead issues of 1876, which fired the House out so that it adjourned without an attempt at a vote on the pending joint rule. The probability is that the whole subject will be dropped to-morrow for public business.

## JOURNALISTIC.

MILWAUKEE, Dec. 13.—This afternoon the company organized to establish a new Republican morning daily paper purchased the Milwaukee News. The price paid is not stated, but it is known to have been above \$15,000. The new paper will be issued soon after January 1. The sale of the News to the Republicans leaves Milwaukee Democrats

without a newspaper organ, and throws out the Associated Press. Hon. Horace Riddle is to be editor-in-chief, and Dr. J. L. Kane, late of the Sentinel, is to be managing editor. It is believed in political circles that the Sentinel will in time become an out-and-out independent journal.

The application of DAY'S KIDNEY PAD is so simple that no one can fail to understand it.

## BIG BLAZE AT CANTON.

Clinton had a big blaze last night. The fire first broke out in the elevator owned by Calvin Pratt, an old building constructed of pine, and kind-dried by a steam feed mill. The flames soon spread to the building known as the Weaver and Pierce elevator, now owned by the Milwaukee & St. Paul railroad company, in which business has recently been conducted by Mr. Conkrite, for Jacob Williams & Co. This building was better constructed and burned slower, but by 1 o'clock, both buildings were burned to the ground. Mr. Pratt had a small amount of insurance on the building. J. C. Church had several thousand bushels of grain and seeds in store there, and his loss will reach \$6,000, on which there is no insurance. Jacob Williams & Co. had about 600 bushels of wheat in the railroad elevator, and J. C. Barker had in the same place 600 bushels of barley, and M. G. Weaver 200 bushels. The total loss from the fire will reach \$15,000 to \$20,000. The fire is supposed to have originated from the steam feed mill in the Pratt elevator, and had it not been for the rain, and the exertions of citizens, the whole east end of the town must have gone.

## CHICAGO GOSSIP.

From Our Regular Correspondent.

CHICAGO, Dec. 13.—Great preparations are being made for the approaching holidays, by everyone. Money is being lavishly expended for presents, and our high-toned retail stores are replete with every novelty of the season, from an improved boot-jack to the imported Chinese slipper and dressing gown. Jewelry stores and candy shops are constantly crowded, while dry goods houses are thronged with ladies fair at all hours, and our street cars literally packed in the early part of the evening, with the gentler sex returning to their respective homes, with parcels, bundles, hand-boxes, pebble-dogs, canary birds, parrots, Guinea-pigs, white mice, and in fact every imaginable household necessity. Business men can hardly get a foothold on street cars, not to speak of a place inside. The dear creatures whose rights are most eminently respected in Chicago, monopolize the yielding ground to the fullest extent.

Many prominent English capitalists are in the city at present, one of whom made a contract with a packing firm to deliver in New York, on or before June 1st, 1881, 2,000 tons of cooked corn beef in cans, and well packed in boxes. The terms were cash on each bill of lading. This gentleman likewise contracted for a very large amount of pork to be shipped during the present winter. I met him in the Palmer house on Saturday last, and I enquired of him in regard to the crops in England. He replied that in some favored localities, all crops were good, on an average. But in the low districts, the yield was very poor and inferior in quality, more especially wheat; and that unless he was mistaken, an immense amount and great demand would be an actual necessity for this country, ere another crop was harvested. This gentleman is just three weeks over from Liverpool, and expresses surprise at the great and rushing business of the western metropolis, and likes the appearance of the American nation and people, greatly.

Many cases of cold are now arriving daily—both hard and soft; but for some inscrutable reason, our daily papers do not mention the fact. Hard cold is now \$8 per ton, and soft, \$8.50.

Wilbur F. Storey had a set-to with an attorney in a justice court the other day. The lawyer, a distinguished man, and the old man was mad when he entered the court room, but quieted down considerably when informed that he would be arrested unless he behaved himself. I chanced to pass on the sidewalk, just as he made his exit, and he looked for all the world like a Chicago candidate for alderman beaten at an election. It is a great treat to observe the venerable and sainted editor of the Times in companionship with the common herd for a few moments in a justice court, and hear him utter playful sentences to the opposing lawyer, such as—"You are a son of-a-bitch!" "You are a mad dog!" and other such terms, with which his mind seems to be so well stored. He will be arrested this week by the lawyer, on two charges, one for the violation of the State law and the other under sec. 27, chap. 28 of the city ordinance.

Editor Palmer, Judge Van Buren, Perry D. Smith, and certain other prominent Chicago Democratic dignitaries, have entered into a solid compact, never more to vote the demerit ticket again, nor to countenance the lost cause. Three cheers for this manifestation of their good common sense.

## SCIENCE AND INDUSTRY.

ROSETTI believes that the temperature of the sun can not be less than 20,000 degrees C.

An observer of Vesuvius notes an increased activity in the crater at the time of each full moon.

In Prussia one person to every 450 is insane. A Berlin scientist attributes this large proportion to intemperance and educational cramming.

The municipal corporation of Berlin has permitted the construction of the Siemens Electrical Elevated Railway, between Wedding-place and Belle-Alliance-place.

During the past season a large workshop in France has been lighted by electricity being generated by the heat used to warm the building.

The shipments of cattle and fresh meat from this country to Europe continue to increase at a great rate. The amount shipped this year promises to be more than double the amount shipped last year.

PROF. SHALER treats in the *Atlantic* of the future of the mining of precious metals on the American continent. He predicts a vast increase in the production of the precious metals; that of silver to be the more important, that of gold to be the more steady.

Some remarkable facts are being elicited by the investigations of naturalists in Borneo. In the stems of certain plants found there galleries are tunneled by a species of ant, and it is asserted that the presence of the ants is actually essential to the existence of the plants, for unless attacked by the insects when young they soon die.

A FRENCH maker of military uniforms, M. Richard, has conceived the idea of utilizing dog-power to drive the sewing-machines, as he found his employees suffered in health, and any other kind of motor would cost too much. The dog is placed in an open cage on an axis, and chained by the neck in front. By the weight of the dog the case goes down, when the animal naturally moves forward, the motion being regulated.

A curious car on the Boston and Albany Railroad is provided with various devices for testing speed, strains, obstructions, resistance, and other matters connected with the running of trains. Different pens, attached to ingenious machinery, record the distance and time, the slips of the driving wheels on the rails, the exact elevation of the outside rail at every curve, and many other points of valuable information in practical railroad engineering.

The *American Dairyman* says that the dairy industry of the United States represents an investment of over \$1,300,000,000 and an annual production of butter and cheese of over \$500,000,000 in value, which is \$50,000,000 more than the wheat crop of the country, one-seventh more than the hay crop, three times more than the corn crop, and one-fifth less than the cotton crop. Over \$20,000,000 pounds of cheese and 1,500,000,000 pounds of butter are made annually. Of the total amount of butter made in the United States, New York produces 140,000,000 pounds yearly and 100,000,000 pounds of cheese.

—Joel Grubbs, of Russellville, Ky. who is ninety-eight years old, frequently walks to Buena Vista Springs, a distance of six miles.

There is in Detroit to-day a man who was wounded five times in less than two minutes at Fair Oaks. The first bullet entered his left arm; the second, gave him a scalp wound; the third hit him in the foot; the fourth buried itself in his shoulder; the fifth entered his right leg. While he was being carried to the rear the first two men who took him were killed. While his wounds were being dressed an exploding shell almost buried him under an avalanche of dirt. In a trice he remained further in the rear. A third explosion, a second avalanche of mud, a man and a mule and dumped him out, and yet to-day he is seemingly hale and hearty and walks without a limp.—*Detroit Free Press.*
